INDEX

Accessory food factor content of cod-liver oil, effect of high temperature on (Southgate) 733
Acetaldehyde, production of, by cells of higher plants (Thomas) 927
Acetoacetic acid in urine, estimation of (Goldblatt) 626
Acidosis, production of, by ingestion of magnesium chloride and strontium chloride (Haldane) 249
Adsorption and fermentation, an arithmetical test of the validity of the theory of Bayliss regarding (Brownlee) 162
Alcohol, effect of, under varying conditions of diet, on man and animals (Southgate) 737
Alcohol, ethyl, production of, by cells of higher plants (Thomas) 927
Alcohol, fate of, in the body (Southgate) 737
Aldehydes, solubility of proteins and proteoses in (Cooper and Nicholas) 533
Allantoin, estimation of, in presence of uric acid, creatinine and amino-acids (Langfeldt and Holmsen) 715
Allelocatalysis and the growth of yeast (Peskett) 474
Amino-acids, action of tyrosinase on (McCance) 1022
Amino-acids, estimation of allantoin in presence of (Langfeldt and Holmsen) 715
Amino-acids, specific dynamic action and metabolism of, the relation between (Seth and Luck) 366
Amino-acids, supposed deaminising action of tyrosinase on (Happold and Raper) 92
Amino-nitrogen, free, interaction of, with glucose (Borsook and Wasteneys) 1128
Ammonia and nicotine, methods for separating (Fodor and Reifenberg) 827
Ammonia, estimation of, in blood and urine (Murray) 294
Anaerobic growth of bacteria (Quastel and Stephenson) 660
Anaerobic growth, some reactions of resting bacteria in relation to (Quastel, Stephenson and Whetham) 304
Andrews, S. The phosphate metabolism in fatigued mammalian muscle 242
Antiglyoxalase and carbohydrate metabolism of muscle (Foster) 757
Antineuritic yeast concentrates (Kinnersley and Peters) 820
Antiscorbutic fraction of lemon juice. III (Zilva) 589
Antiscurvy value of fruits and vegetable juice, the influence of storage on (Delf) 141
Apple juice as a source of sorbitol (Tutin) 416
Apple leaves, normal and "silvered," the pectin content of (Tutin) 414
Apple tissue, relation of pectose and pectin in (Carré) 257
Archibald, W., *see* Stewart, C. P.
Arginine as precursor of purines (Stewart) 266, 1101
Arginine, direct estimation of (Plimmer and Rosedale) 1020
Ascaris lumbricoides, nature of the metabolic processes in (Slater) 604
Autolysis of muscle of cod fish (Callow) 1

Bacharach, A. L. A note on the basal vitamin B-free diet of Drummond and Watson 638
Bacteria, nitroprusside reaction of (Callow and Robinson) 19
Bacteria, observations on the anaerobic growth of (Quastel and Stephenson) 660
Bacteria, resting, dehydrogenations produced by (Quastel and Whetham) 520, 645; (Quastel and Wooldridge) 652
Bacteria, resting, some reactions of, in relation to anaerobic growth (Quastel, Stephenson and Whetham) 304
Bacteria, the lipochromes present in (Reader) 1039
Bacterial decay of textile fibres (Thaysen and Bunker) 1088
Bacterial growth, a possible rôle of pyruvic acid in (Quastel) 641
Bactericidal action of blood in certain dietary deficiencies (Findlay and Maclean) 63
Bactericidal action of some organic compounds of mercury (Henry, Sharp and Brown) 513
Barratt, J. O. W. Hydrolytic dissociation curves 875
Beef, the effect of short periods of cold storage on (Clifford) 998
Bicarbonate of the plasma and the hydrogen ion concentration of the blood of guinea-pigs suffering from scurvy (Lepper and Zilva) 581
Bicarbonate of the plasma, microtitration of (Lepper and Martin) 573
Bielozerski, A. N., *see* Blagoveschenski, A. V.
Blagoveschenski, A. V. and Bielozerski, A. N. The specific action of plant ferments. II. The specific conditions of action of leaf peptases 355
Blagoveschenski, A. V. and Sossiedov, N. I. The specific action of plant ferments. I. The specific conditions of action of leaf invertases 350
Blood, bactericidal action of, in certain dietary deficiencies (Findlay and Maclean) 63
Blood, estimation of ammonia and urea in (Murray) 294
Blood, estimation of calcium in (Stanford and Wheatley) 710
Blood, estimation of carbon monoxide in (Tervaert) 300
Blood, estimation of cyanates in (Montgomery) 71
Blood, estimation of fat in (Stewart and White) 840

CONTENTS

No. 1

PAGE

I. The Autolysis of the Muscle of the Cod Fish. By E. H. Callow. (With three figures) 1

II. The Preparation and Properties of Purified Oleic Acid and some of its Salts. By A. Lapworth, L. K. Pearson and (in part) E. N. Mottram. (With two figures) 7

III. The Nitroprusside Reaction of Bacteria. By A. B. Callow and M. E. Robinson 19

IV. The Diazo Reaction in Urine. By G. Hunter 25

V. Carnosine of Muscle and Iminazole Excretion in the Urine. By G. Hunter 34

VI. Colour Standards for use in the Determination of Iminazoles. By G. Hunter 42

VII. The Presence of Vitamin A in Yeast Fat. By E. M. Luce and I. Smedley MacLean. (With three figures) 47

VIII. The Effect of Irradiation and Diet on Calcium and Phosphorus Metabolism. By J. M. Henderson. (With two figures) 52

IX. The Bactericidal Action of the Blood in Certain Dietary Deficiencies. By G. M. Findlay and I. MacLean 63

X. The Determination of Cyanates in Blood. By E. G. Montgomery . 71

XI. A Possible Correlation between Dietary Protein and Loss of Fur in Young Growing Rats. By G. A. Hartwell. (With one figure) . . . 75

XII. The Osmotic Pressure of Haemoglobin. An Explanation of the Effect of Acetic Acid, based on Donnan's Theory of Membrane Equilibrium. By H. C. Wilson 80

XIII. The Tyrosinase-Tyrosine Reaction. II. The Theory of Deamination. By H. S. Raper and A. Wormall 84

XIV. The Tyrosinase-Tyrosine Reaction. III. The Supposed Deaminising Action of Tyrosinase on Amino Acids. By F. C. Happold and H. S. Raper 92

XV. The Effects of Calcium Glycerophosphate, Sodium Glycerophosphate and Sodium Dihydrogen Phosphate upon the Skeleton of Rats kept on a Diet Deficient only in Fat-soluble Factor. By V. Korenchevsky and M. Carr . 101

XVI. Further Experiments on the Influence of the Parents' Diet upon the Young. III. The Influence upon the Young of an excessive amount of Calcium in the Mother's Diet during Pregnancy. By V. Korenchevsky and M. Carr 112

XVII. The Phosphoric-esterase of Blood at Various Hydrogen Ion Concentrations. By M. Martland 117

XVIII. The Early Action of Insulin in the Diabetic. By L. Lawn and C. G. L. Wolf 122

PAGE

XIX. The Influence of Oxygen on the Production of Urea by Enzymes of the Liver and Spleen. By R. A. McCance. (With four figures) . . . 134

XX. The Influence of Storage on the Antiscurvy Value of Fruits and Vegetable Juices. By E. M. Delf. (With two figures) 141

XXI. A Chemical Study of Defective Ossification in Rachitic Animals. By R. Robison and K. M. Soames 153

XXII. An Arithmetical Test of the Validity of the Theory of Bayliss regarding Fermentation and Adsorption. By J. Brownlee 162

No. 2

Obituary Notice. H. T. Brown 165

XXIII. The Determination of Guanidines in Urine as Picrates. By J. S. Sharpe. (With Plate I) 168

XXIV. The Diazo Reaction in Uraemic Sera. By L. F. Hewitt . . 171

XXV. Studies on Xanthine Oxidase. IV. Relation of Xanthine Oxidase and similar Oxidising Systems to Bach's Oxygenase. By S. Thurlow . . 175

XXVI. Studies on the Nature of the Process of Germination. A New Method for the Determination of Proteins by means of Adsorption applied to the Decomposition of Proteins in Germinating Pea Seeds. By A. Fodor and A. Reifenberg 188

XXVII. Glutathione. The Occurrence and Quantitative Estimation of Glutathione in Tissues. By H. E. Tunnicliffe 194

XXVIII. Glutathione. Relation between the Tissues and the Oxidised Dipeptide. By H. E. Tunnicliffe. (With four figures) 199

XXIX. Glutathione. Synthesis. By C. P. Stewart and H. E. Tunnicliffe 207

XXX. The Effect of Halogen Salts on Salivary Digestion. By W. M. Clifford 218

XXXI. The Influence of Different Substances on the Diastatic Activity of Saliva. By H. Walker. (With 16 graphs) 221

XXXII. A Comparison of Dried and Evaporated Milks by a Dietetic Method. By G. A. Hartwell. (With two figures) 226

XXXIII. Mercurialis. I. The Development of a Blue Pigment on Drying. By P. Haas and T. G. Hill 233

XXXIV. Mercurialis. II. The Occurrence of a Chromogen showing a remarkable Avidity for Free Oxygen. By P. Haas and T. G. Hill . . 236

XXXV. Synthesis of Vitamin A by a Fresh-water Alga, *Chlorella* (sp.?). By K. H. Coward. (With one figure) 240

XXXVI. The Phosphate Metabolism in Fatigued Mammalian Muscle. By S. Andrews 242

XXXVII. The Production of Acidosis by Ingestion of Magnesium Chloride and Strontium Chloride. By J. B. S. Haldane 249

XXXVIII. Oxidative Deamination by a Basidiomycete Enzyme. By M. E. Robinson and R. A. McCance. (With two figures) 251

XXXIX. The Relation of Pectose and Pectin in Apple Tissue. By M. H. Carré. (With one figure) 257

XL. Studies on the Metabolism of Arginine and Histidine. Part I. Arginine and Histidine as Precursors of Purines. By C. P. Stewart . . 266

PAGE

XLI. A Method of Microtitration. By P. B. Rehberg. (With one figure) 270

XLII. The Determination of Urea in 0·1 cc. of Blood by Microtitration. By P. B. Rehberg. (With one figure) 278

XLIII. The Surface Tension of Gelatin Solutions. J. H. St Johnston and G. T. Peard. (With four figures) 281

XLIV. The Occurrence of Diastase in the Cerebro-spinal Fluid. By I. Cohen. (With one figure) 290

XLV. The Estimation of Ammonia and Urea in Blood and Urine. By M. M. Murray. (With one figure). 294

XLVI. Determination of Carbon Monoxide in Blood. By D. G. C. Tervaert. (With one figure) 300

XLVII. Some Reactions of Resting Bacteria in Relation to Anaerobic Growth. By J. H. Quastel, M. Stephenson and M. D. Whetham . . 304

XLVIII. The Influence of Blood Serum and of Sugars on Haemolysis. By W. P. Kennedy. (With two figures) 318

XLIX. The Relation between Sulphur and Nitrogen Metabolism. By H. E. C. Wilson 322

L. A Note on the Kinetics of Enzyme Action. By G. E. Briggs and J. B. S. Haldane 338

No. 3

LI. Haemoglobin in Relation to other Metallo-haematoporphyrins. By R. Hill. (With Plate II) 341

LII. The Specific Action of Plant Ferments. I. The Specific Conditions of Action of Leaf Invertases. By A. V. Blagoveschenski and N. I. Sossiedov 350

LIII. The Specific Action of Plant Ferments. II. The Specific Conditions of Action of Leaf Peptases. By A. V. Blagoveschenski and A. N. Bielozerski 355

LIV. The Physiology of Gastric Urease. By J. M. Luck and T. N. Seth. (With one figure) 357

LV. The Relation between the Metabolism and the Specific Dynamic Action of Amino-acids. By T. N. Seth and J. M. Luck. (With four figures) . 366

LVI. On the Methods of Fitting the Formula of Michaelis in Relation to the Effect of Hydrogen Ion Concentration on Enzyme Action to the Data: with some Discussion of the Results. By J. Brownlee. (With two diagrams) 377

LVII. A Study of the Oxidation of the Ammonium Salts of Normal Saturated Fatty Acids and its Biological Significance. By P. W. Clutterbuck and H. S. Raper 385

LVIII. Studies on the Physiology of Plain Muscle. III. Comparison of the Reducing Properties of Plain and Striated Muscle. By S. Tsubura . 397

LIX. Animal Quinoidine. (Preliminary Paper.) By H. W. Kinnersley, R. A. Peters and B. T. Squires 404

LX. The Pectin Content of Normal and "Silvered" Apple Leaves. By F. Tutin 414

LXI. Chemical Investigations of Fruits and their Products. I. Apple Juice as a Source of Sorbitol. By F. Tutin 416

LXII. Chemical Investigations of Fruits and their Products. II. The Fate of Sugar during "Cider Sickness." By F. Tutin 418

PAGE

LXIII. Oxidising Enzymes. VIII. The Oxidation of Certain Para-hydroxy-compounds by Plant Enzymes and its Connection with "Tyrosinase." By M. W. Onslow and M. E. Robinson 420

LXIV. Cholesterol Synthesis in the Animal Body. By H. J. Channon. (With three figures) 424

LXV. Some Phosphorus Compounds of Milk. I. The Presence in Milk of Organic Acid-soluble Phosphorus Compounds. By H. D. Kay. (With one figure) 433

LXVI. Note on the Phosphorus Content of the Blood of Ruminants. By H. D. Kay 447

LXVII. The Influence of Washing upon the Reproductive Rate of *Colpidium colpoda*. By D. W. Cutler and L. M. Crump 450

LXVIII. The Chemical Nature of the Membrane of Potato Cork. By E. Rhodes. (With one figure) 454

LXIX. Studies on the Growth of Yeast. I. The Influence of Volume of Culture Medium Employed. By G. L. Peskett. (With one figure) . . 464

LXX. Studies on the Growth of Yeast. II. A Further Note on Allelocatalysis. By G. L. Peskett. 474

LXXI. Fermentation by Dried Yeast Preparations. By A. Harden. (With four figures). 477

LXXII. The Estimation of Phosphorus and Magnesium. By C. P. Stewart and W. Archibald 484

LXXIII. Contributions to the Study of Brain Metabolism. I. Carbohydrate Metabolism. (Preliminary Paper.) By B. E. Holmes and E. G. Holmes. 492

LXXIV. The Persistence of Vitamin A in Plant Tissues. By K. H. Coward. (With four figures). 500

LXXV. Studies on Xanthine Oxidase. V. The Function of Catalase. By M. Dixon. (With two figures). 507

LXXVI. Bactericidal Action of some Organic Compounds of Mercury. By T. A. Henry, T. M. Sharp and H. C. Brown 513

LXXVII. Dehydrogenations produced by resting Bacteria. I. By J. H. Quastel and M. D. Whetham. (With six figures) 520

No. 4 – 6 = vol 192, 1925.

LXXVIII. The Solubility of Proteins and Proteoses in Aldehydes and other Organic Solvents. By E. A. Cooper and S. D. Nicholas . . . 533

LXXIX. The Glucose Content of Normal Urine. By G. S. Lund and C. G. L. Wolf 538

LXXX. Estimation of Sugar in Small Quantities of Blood. By D. G. C. Tervaert 541

LXXXI. Haemocyanin. Part I. The Dissociation Curves of the Oxy-haemocyanin in the Blood of some Decapod Crustacea. By Ellen Stedman and Edgar Stedman. (With three figures) 544

LXXXII. The Changes in Conductivity of Red Cell Suspensions during Haemolysis. By E. Ponder and W. W. Taylor 552

LXXXIII. The Influence of Small Quantities of Potassium Iodide on the Assimilation of Nitrogen, Phosphorus and Calcium in the Growing Pig. By F. C. Kelly 559

PAGE

LXXXIV. The Effect of Ultra-Violet Light on the Mineral Metabolism of the Lactating Animal. (Preliminary Communication.) By J. B. Orr, H. E. Magee and J. MacA. Henderson 569

LXXXV. A Micro-Method for Titrating the Bicarbonate in Plasma. By E. H. Lepper and C. J. Martin. (With two figures) 573

LXXXVI. The Bicarbonate of the Plasma and the Hydrogen Ion Concentration of the Blood of Guinea-Pigs suffering from Scurvy. By E. H. Lepper and S. S. Zilva 581

LXXXVII. The Antiscorbutic Fraction of Lemon Juice. III. By S. S. Zilva 589

LXXXVIII. The Effects of Parathyroid Feeding on Calcium and Creatine Metabolism. By D. Woodman 595

LXXXIX. Urea Estimations on Small Quantities of Blood. By J. Patterson 601

XC. The Nature of the Metabolic Processes in *Ascaris lumbricoides*. By W. K. Slater 604

XCI. The Use of the Glass Electrode in Biochemistry. By P. T. Kerridge. (With three figures) 611

XCII. The "Third Component" or Heat-Stable Factor of Complement. By H. R. Whitehead, J. Gordon and A. Wormall 618

XCIII. The Estimation of Acetoacetic Acid and β-Hydroxybutyric Acid in Urine. By M. W. Goldblatt 626

XCIV. A Note on the Blood-Sugar Levels of Rats Fed with Complete Diets and Diets Deficient in Vitamin B. By P. Eggleton and L. Gross. (With three figures) 633

XCV. A Note on the Basal Vitamin B-Free Diet of Drummond and Watson. By A. L. Bacharach. (With one figure) 638

XCVI. On a Possible Rôle of Pyruvic Acid in Bacterial Growth. By J. H. Quastel. (With one chart) 641

XCVII. Dehydrogenations produced by Resting Bacteria. II. By J. H. Quastel and M. D. Whetham. (With three figures) 645

XCVIII. Dehydrogenations Produced by Resting Bacteria. III. By J. H. Quastel and W. R. Wooldridge 652

XCIX. Further Observations on the Anaerobic Growth of Bacteria. By J. H. Quastel and M. Stephenson 660

C. Cholesterol Secretion in the Urine. Part I. By J. A. Gardner and H. Gainsborough. 667

CI. Studies on Xanthine Oxidase. VI. A Cell Oxidation System independent of Iron. By M. Dixon and S. Thurlow 672

CII. The Pectic Substances of Plants. Part III. The Nature of Pectinogen and its Relation to Pectic Acid. By F. W. Norris and S. B. Schryver . 676

CIII. A Note on the Occurrence of a Pectic Substance in Beech Wood. By M. H. O'Dwyer 694

CIV. The Estimation of Phosphorus Compounds in Blood. By R. V. Stanford and A. H. M. Wheatley 697

CV. The Distribution of Phosphorus Compounds in Blood. By R. V. Stanford and A. H. M. Wheatley 706

CVI. The Estimation of Calcium in Blood. By R. V. Stanford and A. H. M. Wheatley 710
